GAP SETTING TOOL AND METHOD OF OPERATING SAME

ABSTRACT OF THE DISCLOSURE

A gap setting tool for setting a gap between a pair of panels includes a first body portion, a second body portion, and a pin having a predetermined diameter. The first body portion, the second body portion, and the pin are movable relative to one another. One of the panels is fixed and the other panel is movably mounted adjacent thereto. The body portions are operable to be attached to respective ones of the pair of panels, such as by vacuum cups or the like, and drawn toward one another with the pin in the gap until the panels contact the pin.
